For further assistance, please call our Customer Services team at +86 400-120-1008 or email at cs@emperorgm.com.

1. The minimum spread refers to the minimum spread level under normal circumstances, which may be widened if the market fluctuates sharply or the liquidity is insufficient.
2. The Locking Position Margin is equivalent to Initial Margin for each Lot
3. You can place orders by choosing market price or a specific limit price. As the market price keeps changing, the price you see when placing an order may differ from the strike price, and the limit order price is likely to differ from the default price.
4. If the account balance is insufficient when the new limit order is triggered, the order will not be partially or fully traded. The limit order is valid and available in any trading day or time.
5. If the position is held later than 23:59 (summer time GMT+3 / winter time GMT +2), interest will be incurred.

If you have not close your position at the close of the trading day on Wednesday (i.e., early Thursday morning), three-day rollover interest will be incurred.

6. Overnight Interest Calculation

6.1 Currency Pair involved USD:

6.1.1 Base Currency - USD: $\text{contract size} * \text{trading lot} * \text{overnight interest rate (\%)} / 360 * \text{days}$

6.1.2 Base Currency is not USD: $\text{closing exchange rate} * \text{contract size} * \text{trading lot} * \text{overnight interest rate (\%)} / 360 * \text{days}$

6.2 Cross Currency:

6.2.1 To know more about the overnight interest calculation of EACH cross currency, please contact our CS team.

Example1: CHF/JPY = $\text{contract size} * \text{trading lot} * \text{overnight interest rate (\%)} / 360 * \text{days} / \text{closing exchange rate of "USD/CHF"}$

Example2: EUR/GBP = $\text{contract size} * \text{trading lot} * \text{overnight interest rate (\%)} / 360 * \text{days} * \text{closing exchange rate of "EUR/USD"}$

6.3 Precious metals:

6.3.1 XAUUSD: closing price * contract size * trading lot * overnight interest rate (%) / 360 * days

6.3.2 XAGUSD: closing price * contract size * trading lot * overnight interest rate (%) / 360 * days

6.3.3 HKGHKD: trading lot * overnight interest amount * days

6.3.4 RKGCNH: closing price * contract size * trading lot * overnight interest rate (%) / 360 * days / exchange rate of USDCNH

6.3.5 RKSCNH: closing price * contract size * trading lot * overnight interest rate (%) / 360 * days / exchange rate of USDCNH

6.4 Energy (USD):

6.4.1 trading lot * overnight interest amount * days

6.5 Indices:

6.5.1 JPN225: trading lot * overnight interest amount * days / closing exchange rate of USDJPY

6.5.2 GER30: trading lot * overnight interest amount * days * closing exchange rate of EURUSD

6.5.3 UK100: trading lot * overnight interest amount * days * closing exchange rate of GBPUSD

6.5.4 CHN50, US30, NAS100 & SPX100: trading lot * overnight interest amount * days

6.6 The annual interest rate will be determined by reference to the relevant market interest rate of at that time and will be post on our EGM MT5 platform.

6.7 We will not pay any interest on the temporary margin in your account.

7. Liquidation

7.1 When the Equity/Margin Ratio (Margin Level) $\leq$ 10%, immediate forced liquidation is triggered. Liquidation sequence: Positions with the largest unrealized

For further assistance, please call our Customer Services team at +86 400-120-1008 or email at cs@emperorgm.com.

loss are closed in full batches first, continuing until the Margin Level > 10%.

7.2 If the Equity/Margin Ratio falls below the specific requirement announced by the company, forced overnight liquidation will be triggered. Liquidation sequence: The last traded order will be partially or completely closed first until the margin is sufficient. If there is an imbalance between the long and short positions in the lock-up situation, The side of last traded order with more lots will be closed partially or fully first; The side with the less lots will not be closed; This continues until sufficient margin is restored or the long and short lot sizes are balanced.

7.3 The lock position of the balance of long and short positions will not trigger the forced liquidation of the market.

7.4 For detailed overnight margin requirements, please refer to the latest announcements on the company website.

7.5 If the market prices move sharply due to large fluctuations or other reasons, it is possible to occur liquidation and negative balance.

This document is current as of the date of publication. The company reserves the right to change the content. For the latest information, please refer to the trading platform or contact customer service. Please note that spreads or margin requirements may change due to market conditions.
